DESCRIPTION

The Aviat Husky A-1C represents one of the most respected and capable backcountry utility aircraft in modern general aviation, combining classic tailwheel flying characteristics with exceptional STOL performance, rugged construction, and impressive versatility. Purpose-built for pilots who demand true off-airport capability, the Husky blends traditional bush flying heritage with modern reliability, making it equally at home on remote gravel bars, mountain strips, grass runways, and cross-country adventures.

This particular configuration, equipped with the iconic high-wing taildragger layout and rugged tundra-ready stance, highlights the Husky's unmistakable bush aircraft presence while preserving the refined handling and operational confidence for which the platform is widely known.

Powerplant, Systems & Technical Highlights

At the heart of the Husky A-1C is the proven Lycoming O-360 series engine, a highly respected powerplant recognized throughout the aviation industry for its durability, simplicity, and strong low-speed performance.

Designed specifically for demanding utility and backcountry operations, the Husky features a lightweight yet robust steel-tube fuselage structure combined with aluminum wings and fabric covering. Its high-lift wing design, large control surfaces, and powerful low-speed handling characteristics deliver exceptional short takeoff and landing capability while maintaining stable cruise performance and responsive control authority.

Exterior & Cockpit

The Aviat Husky A-1C carries a timeless bush aircraft design, with its muscular stance, large tundra-capable landing gear, and high-wing profile immediately reflecting its serious utility mission. Functional simplicity and rugged engineering define the aircraft's exterior, while its clean lines and purposeful proportions give it a commanding presence both on remote strips and airport ramps alike.

Inside, the cockpit is designed around visibility, durability, and pilot control. Expansive side windows and the elevated seating position provide excellent situational awareness, particularly during low-level operations and backcountry approaches. The cabin layout emphasizes straightforward functionality, with ergonomic controls, dependable instrumentation, and practical storage solutions supporting both recreational and mission-focused flying.

Maintenance & Records

This aircraft is described as professionally maintained and carefully operated, reflecting strong attention to airframe integrity, engine reliability, and operational readiness in a variety of environments.

Routine inspections, organized maintenance documentation, and proper care remain critical components of Husky ownership, helping preserve long-term dependability, performance capability, and overall aircraft value.

The Perfect Airplane For

The Aviat Husky A-1C is ideally suited for backcountry pilots, bush flying enthusiasts, private owners, and utility operators seeking a highly capable aircraft with exceptional STOL performance, rugged reliability, and true off-airport versatility.

Whether used for wilderness exploration, remote airstrip access, aerial photography, recreational adventure flying, or pure tailwheel enjoyment, the Husky delivers an unmatched combination of durability, control precision, and classic stick-and-rudder flying experience.

For pilots who appreciate authentic bush flying capability, proven utility performance, and the timeless character of a true backcountry aircraft, the Aviat Husky A-1C remains one of the most respected and versatile platforms in today's utility aviation market.

SPECIFICATIONS

Engine & Power Systems

Engine	**Lycoming O-360-A1P**
Engine Type	**Four-cylinder, carbureted Piston Engine**
Horsepower	**180 HP**
Propeller Type	**Constant-speed propeller**

Performance & Specifications

Cruise Speed	**Approximately 120–130 KTAS**
Range	**Approximately 700 NM**

IMPORTANT INFORMATION

Closing times can change

The closing time shown is indicative. Auctions may be extended automatically when bids arrive close to the deadline, and CollectAirs may reschedule, pause or withdraw a lot at any time. The time shown on the website governs.

Prices are indicative

Starting prices, current bids and any reserve are subject to change and may be corrected, revised or withdrawn. Where a lot carries a reserve, the amount is confidential and the lot will not sell below it. Figures here exclude applicable fees, taxes, duties, transport and registration costs.

No offer and no contract

This document is provided for information only. It is not an offer, a valuation, an appraisal, or an invitation to treat, and it forms no part of any contract. Bidding and sale are governed solely by the CollectAirs Terms and Conditions in force at the time of the auction.

Condition and airworthiness

Aircraft are sold as they stand. Descriptions, specifications, hours, dates and maintenance status are supplied by the seller and, while CollectAirs curates and verifies listings, they are not warranted as complete or accurate. Buyers are expected to carry out their own inspection, records review and pre-purchase survey before bidding.

Export, registration and compliance

Deregistration, export, import, customs, tax and re-registration are the buyer's responsibility, as is confirming that the aircraft can be lawfully imported and operated in the intended jurisdiction. Requirements vary by country and can affect both cost and timescale.

Photography and written content

Photographs are supplied by the seller and may have been edited for exposure, colour, straightening or the removal of background distractions, in some cases with AI-assisted tools. Parts of the written description and specification summaries may also have been drafted or edited with AI assistance for clarity and consistency. Such enhancements are made to present the aircraft clearly and are not intended to conceal, add or alter any physical feature, damage or defect. Photographs are illustrative, treat the aircraft itself, and its records, as the only authority on condition.

Seller identity

Seller names are shown in the partially masked form used across the platform. Full counterparty details are exchanged through CollectAirs once an auction concludes.
